

## Getting Started

To ensure accurate sizing, please be sure to print this chart on standard 8.5" x 11" paper at 100%.

- Place the chart on a hard, flat surface.
- Place your child's heel on dotted line. A child's foot develops in stages and our shoes are proportionally engineered for those stages of development.
  - Green (Smaller®)** is meant for babies with malleable feet.
  - Blue (See Kai Run®)** is for walking and active toddlers who have yet to develop arches.
  - Orange (Kai®)** is for fully-active big kids with noticeable foot development.
- Measure both feet and use the largest measurement to determine your shoe size. If your kiddo wears socks with their See Kai Run's, please measure with socks on. If your largest toe lands in-between lines, use the next line above to determine your shoe size.

**NOTE:** Our chart has accommodated for extra growth/wiggle room since little feet grow quickly.

To test accurate print size, this space is equal to the size of a US Quarter

	6
(12-18 mos.)	5
(9-12 mos.)	4
(6-9 mos.)	3
(0-6 mos.)	

**smaller®**
